

## HAZWOPER 8 Hour Annual Refresher Course

### Course Description

This course meets the requirements in OSHA 29 CFR 1910.120 for 8 hours of annual refresher training for workers at hazardous waste sites. This course is designed for general site workers who remove hazardous waste or who are exposed or potentially exposed to hazardous substances or health hazards. Topics include HAZWOPER regulations, safety and health plans, hazardous chemicals, safety hazards, air monitoring, medical surveillance, site control, decontamination, personal protective equipment, and respiratory equipment. This course covers the topics in OSHA 29 CFR 1910.120

### Learning Objectives

- Read and understand OSHA regulations and requirements
- Use Site Characterization to identify hazards found in the workplace and steps to be taken to minimize hazards
- Understand the principles of toxicology and how they relate to various types of chemical exposures
- Develop a Medical Surveillance Program and understand its purpose
- Identify the uses for Personal Protective Equipment (PPE) and how to choose the correct PPE for a situation
- Understand the principles of decontamination as well as levels of decontamination and decontamination methods
- Have a better understanding of potentially hazardous situations involving corrosives, solvents, oxidizers, and reactive chemicals
- Understand the various considerations in an emergency and the importance of training and actions to personal safety and the safety of others

### Regulatory

Please refer to the state/regulatory requirement in the course catalog page.

### Seat Time

This course has been approved for 8 hours

### Course Pre-Requisite

Must have taken the 24 or 40 hour HAZWOPER course

### Testing

Quizzes: All quizzes must be passed with a 100% to proceed to the next lesson. Final Exam: Final exam must be passed with a 70% to pass the next course. The final exam can be taken three times if necessary.

### Topics Covered

- Regulation Overview
- Hazard Recognition
- Site Characterization, Analysis, and Control
- Toxicology
- Medical Surveillance
- Safe Work Practices and PPE
- Decontamination
- Chemical Awareness
- Emergency Procedures
